Mahmoud Hussein

Senior Mobile Engineer (Flutter) | Mobile Team Lead

Giza, Egypt | +20 102 465 7789 | mahmoudxp23@gmail.com

PROFESSIONAL SUMMARY

Senior Mobile Engineer with 6 years of experience building and shipping cross-platform Flutter and Dart applications for iOS and Android, currently leading the mobile team at Ashtar. Experienced in mentoring developers, code review, owning releases end to end, and introducing AI-assisted engineering workflows that raise team productivity without compromising quality.

PROFESSIONAL EXPERIENCE

Mobile Team Lead | Ashtar 11/2025 – Present

- Lead the mobile development team across iOS and Android, managing task distribution, technical decisions, development workflows, and delivery priorities.
- Define and enforce mobile engineering standards, including Clean Architecture, SOLID principles, reusable components, state management, and scalable project structure.
- Oversee the complete mobile development lifecycle, including requirements analysis, architecture design, implementation, testing, deployment, monitoring, and production support.
- Mentor and support team members by improving development standards, reusable component structures, coding practices, and technical decision-making.
- Leverage AI-assisted development workflows to accelerate implementation, code analysis, debugging, documentation, and engineering decision-making while maintaining established architectural and quality standards.
- Establish reusable AI-agent rules and workflows for code generation, code review, testing, and documentation.
- Design and maintain AI agent workflows using orchestration, Superpowers workflows, and Delegate Skills to automate repetitive development tasks, coordinate specialized engineering agents, and improve team productivity.

Senior Flutter Developer | Kuwait Star 01/2025 – 11/2025

- Conducted code reviews for other team members.
- Performed application tests and evaluations before launch.
- Involved in the entire software development process for the project: requirement specification, design, implementation, and testing.
- Integrated the Adjust deep linking tool.
- Integrated Firebase Analytics to track user events in apps.
- Collaborated with the quality assurance and testing teams, providing timely fixes and updates to guarantee a smooth end-user experience.
- Worked closely with other team members to plan, design, and develop robust solutions in a timely manner using ClickUp.
- Used Riverpod state management to handle all interactions between UI and business logic.

Senior Flutter Developer | Almotahida Education Group 05/2023 – 12/2024

- Designed and set up different environments and flavors for development, testing, staging, and production.
- Conducted code reviews for other team members.
- Performed application tests and evaluations before launch.
- Involved in the entire software development process for the project: requirement specification, design, implementation, and testing.
- Complied with all Apple App Store and Google Play Store guidelines to provide rapid approval and deployment to retail channels.
- Collaborated with the quality assurance team to identify and address reported bugs, providing timely fixes and updates to guarantee a smooth end-user experience.
- Worked closely with other team members to plan, design, and develop robust solutions in a timely manner.
- Used the Flutter Provider design pattern to handle all interactions between UI and business logic.

Flutter Developer (Mid-level) | Focal Point 04/2022 – 04/2023

- Distributed apps using Firebase for internal testing.
- Collaborated with the quality assurance team to identify and address reported bugs, providing timely fixes and updates to guarantee a smooth end-user experience.
- Successfully integrated third-party libraries and plugins to extend app functionality, ensuring compatibility and minimizing potential conflicts.
- Collaborated closely with product managers, designers, and backend developers to gather requirements, define project scope, and ensure seamless integration of frontend and backend functionalities.
- Developed and maintained high-quality, reusable, and efficient Flutter widgets and components, contributing to a consistent and polished user interface across applications.
- Involved in the entire software development process for the project: requirement specification, design, implementation, and testing.
- Coordinated application plans with development teams and designed prototypes.
- Worked closely with other team members to plan, design, and develop robust solutions in a timely manner.
- Collaborated with the support team to assist client stakeholders with emergent technical issues and develop effective solutions.
- Used the Flutter BLoC design pattern to handle all interactions between UI and business logic.

Junior Flutter Developer | Dallel Dev 04/2021 – 04/2022

- Used the Flutter Provider design pattern to handle all interactions between UI and business logic.
- Dealt with various problems related to the iOS deployment process.
- Implemented offline mode so users can interact with features without internet and sync all actions once the connection is back.
- Handled all server and internet connection errors and displayed them clearly in the UI.

PROJECTS

See all live and published apps (Google Play and App Store links):
https://github.com/mahmoudhussein1996/MyDeployedApp/blob/main/deployedApps.md

TECHNICAL SKILLS

Mobile: Flutter, Dart, Android, iOS, Cross-Platform Development, Localization (multi-language, RTL)
Architecture: Clean Architecture, SOLID Principles, MVVM, MVC, Design Patterns
State Management: Riverpod, BLoC, Cubit, Provider, GetX
Networking & Auth: REST APIs, Dio, HTTP, Postman, JWT, OAuth
Local Storage: Hive, SQFLite (SQLite), Shared Preferences, Offline-First Sync
Firebase: Cloud Messaging (FCM), Analytics, App Distribution, Dynamic Links; Local Notifications
Integrations: Google Maps API, Live Location Tracking, Payment Gateways, In-App Purchases, AdMob, Adjust, Facebook API, Google Cloud APIs
Testing & Delivery: Unit, Widget and Integration Testing, CI/CD, Git, App Store and Google Play Publishing
AI Engineering: AI-Assisted Development, AI Coding Agents, Multi-Agent Orchestration, AI Code Review Workflows
Leadership & Process: Team Leadership, Mentoring, Code Review, Agile/Scrum, Jira/ClickUp
